3 concepts make us
different...

Three concepts have always characterized our essence:
Knowledge, Experience, Reliability.

KNOWLEDGE

Daily use and the constant search for cutting-edge *know-how* in our field allow us to reach the highest quality standards.

EXPERIENCE

More than half a century of history in blowing to promptly respond to several customer requests.

RELIABILITY

We work to establish a solid relationship with our customers, ensuring their continuous assistance in the phases of pre and post sales.

ABOUT US

ABOUT THE COMPANY

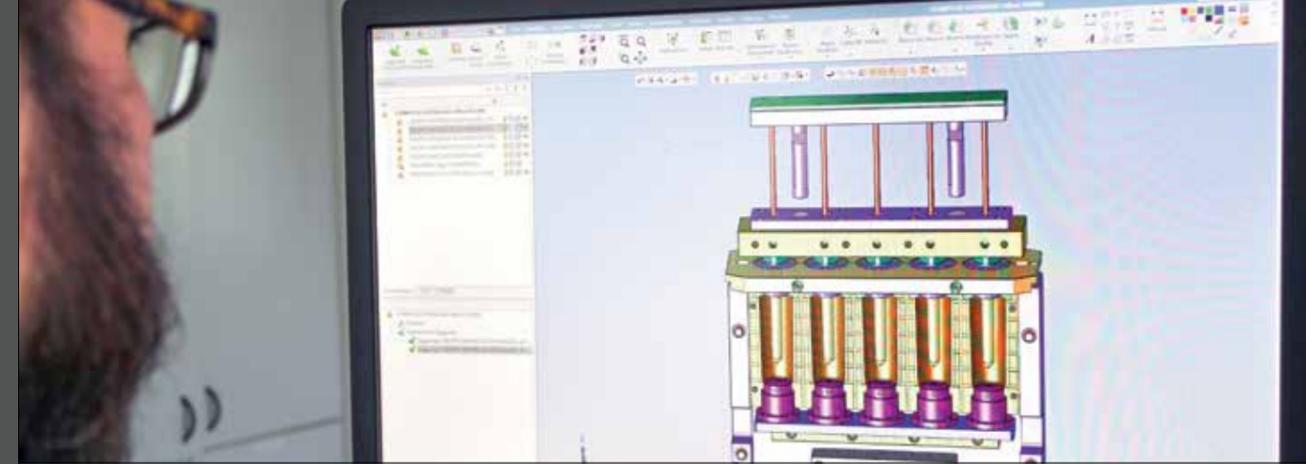

"We are convinced that, to hold prestigious international positions, first of all, we need extraordinary and reliable people..."

Preven is a family company with an innovative and dynamic vision of the market, with an eye constantly focused on development of new ideas and solutions.

We are specific in the design and construction of extrusion heads for all main brands of extrusion blow moulding machines and of moulds for the injection stretch blow moulding machines 'one step' like ASB Nissei, Aoki, Magic MP, Automa/Sipa.

A continuous research of very high-quality standards, a total quality research, the use of first-quality materials, a unique specific *know-how*, the Preven 100% *made in Italy* brand, but mainly, our proven reliability and credibility on the market, allow us to fully satisfy any customer request.

Our simple and flexible structure let us find customized solutions reducing the realisation costs.

OUR DEPARTMENTS

Sales

Preven has an experienced sales' office in the blowing market, able to satisfy customers with integrated solutions for all requests. We are assisted, worldwide, by an agents' network making ours an international company in all respects.

R&D

For the research & development of our products, our team of engineers uses an integrated system able to control each phase of the production process, drastically reducing the possibility of error.

Production

100% *Italian know-how*, 100% production activity in Italy, cutting-edge technological solutions, first-class raw materials and treatments, all that ensures customers of high quality product standards.

After Sales

Our philosophy, *Customer Oriented*, puts customers in the spotlight. Thanks to our *know-how* and the competence of our team, we guarantee technical testing and assistance services, on time, made of answers and prompt solutions both in the pre and post-sales phases.

PRODUCTION

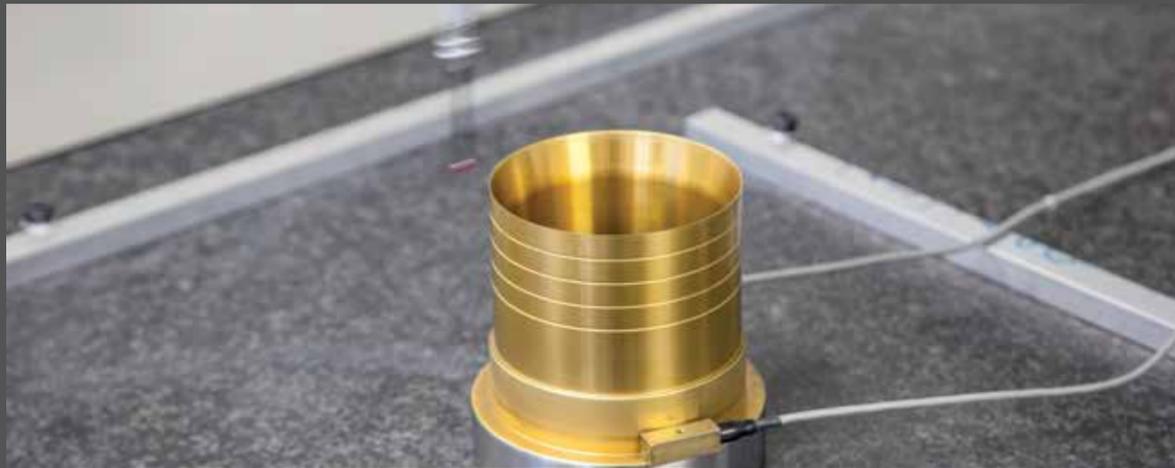

COST-EFFECTIVE PROCESSES, HIGHER PRODUCTION

We take care of every step of the production process internally, from design to final testing

The competitive and constantly evolving environment in which Preven is operating, imposes changes not only in terms of developed products but also in terms of *business process re-engineering*.

Therefore, it is essential that all processes achieve excellent quality standards and high levels of performance to meet the most diversified needs of the markets.

AN ADVANCED METROLOGY ROOM

Every finished product is carefully tested and checked because it has to generate value for our customers.

A succession of procedures and guidelines, protocols, guarantee very high quality standards of the products made, but also the improvement of the processes used.

WE ARE TECHNOLOGICAL BY NATURE

We think technology and innovation are an indissoluble union, they are representing both our nature and our aptitude. Thanks to the knowledge gained in fifty years of experience in our field and the use of advanced technologies, we are able to provide flexible and integrated solutions.

Research & Development

...internal of the mechanical components of our extrusion heads and ISBM moulds, made directly from our production facility in Italy.

Material Selection

...accurate, processed by our latest generation CNC machines capable of performance up to 20.000 rpm, obtaining the highest quality final products.

Technical Testing

...internal, performed by skilled staff taking care of each stage of the manufacturing process, paying attention to final setups.

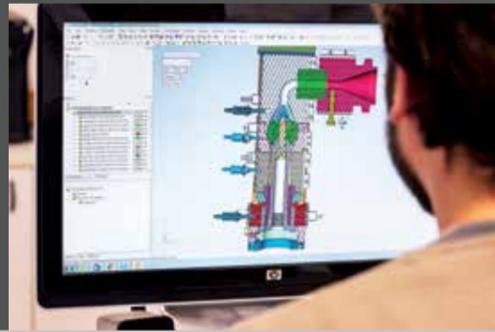

EXTRUSION HEADS

DESIGNED TO GUARANTEE...

▶ RELIABILITY

The production of each component is defined after an accurate analysis of the function that will cover...

▶ PERFORMANCE

All components are submitted to an accurate testing with state-of-the-art measurement equipment...

▶ DURABILITY

The raw materials, as well as the heat and surface treatments used in the construction of our products, are of high quality...

ONE STEP MOULDS ISBM

INJECTION - STRETCH - BLOW MOULDING FOR ISBM MACHINES ASB NISSEI, AOKI, MAGIC MP, AUTOMA / SIPA

▶ PREFORMA DESIGN

Our technical office team studies and analyses the bottle *'geometry'* to design the ideal preform for this *'one step'* technology.

▶ 100% MADE IN ITALY

We design, manufacture and assemble all the components of our mould rigorously in our production plants in Italy thanks to the help of highly skilled staff.

▶ MOULD TESTING

Thanks to the support of skilled technicians, we provide for the mould testing and, on request, to the mould installation and start-up services directly on the machine, at the customer's company.

50th YEARS SINCE 1968

The logo for PREVEN, featuring a stylized green 'P' inside a white square, positioned above the word 'PREVEN' in white capital letters.
